Nikhil Shinde

AI Product Builder · Founder, Classgrid AI

Pune, India | nikhil.shinde@classgrid.in | +91 8623947038 | linkedin.com/in/nikhil-shinde-286937367 | github.com/Nikhilnick5050 | chat.classgrid.in

SUMMARY

Computer Engineering student (graduating 2029) who founded and shipped **Classgrid AI**, a live AI agent people can use on the web and call on WhatsApp. I design features, write the specs, build with AI coding tools, and run the production stack on AWS, Cloudflare, MongoDB and Vercel. Looking for an AI product, solutions or operations internship.

EXPERIENCE

Founder & Product Lead, Classgrid AI · chat.classgrid.in — Pune · Dec 2025 – Present

- Built and launched an AI agent that researches with sources, reads files, runs code in a private sandbox, makes Word, Excel, PowerPoint and PDF files, creates images and publishes websites.
- Shipped **WhatsApp voice calls**: users call the agent, hand over a task, and get the result on WhatsApp; long tasks run in the background for up to 48 hours.
- Added **20 AI models from 9 providers** (Claude, DeepSeek, GLM, Kimi, Qwen and more) with automatic routing, plus native image understanding on supported models.
- Launched **Project Mode**, an in-browser code editor linked to GitHub where the agent makes changes and opens pull requests, with one-click Vercel previews.
- Connected **21 plugins** (Gmail, Google Calendar, Drive, Classroom, Notion, Slack, GitHub, Zoom and more) and an MCP connector so Claude and ChatGPT can use Classgrid.
- Designed a credit-based pricing system in rupees (free tier, Razorpay top-ups, per-model costs) and an internal admin dashboard for usage, billing and support.
- Run production on AWS EC2, Cloudflare (Workers AI, R2), MongoDB, Supabase and Vercel; built the marketing site, docs and email system at classgrid.in.

PRODUCTS I LED AT CLASSGRID

- **classgrid.in**: the marketing website, documentation, blog and changelog, with an AI help assistant that answers from the docs.
- **GridX**: Classgrid's own React UI component library, used to keep every Classgrid app consistent.
- **Classgrid connector (MCP)**: lets Claude and ChatGPT read a user's Classgrid schedules, chats and profile with their permission.
- **Grids**: messaging inside Classgrid AI, with direct chats, groups, polls and a shared AI chat for up to 4 people.

SKILLS

Product: feature specs, roadmaps, pricing design, user feedback, writing docs and changelogs, competitor research

AI: AI agents and tool use, LLM selection and cost control across 20 models, prompt design, AI coding tools (Claude Code), MCP

Cloud & operations: AWS (EC2, billing), Cloudflare (Workers AI, R2), MongoDB, Supabase, Vercel, GitHub, Razorpay

Familiar with: JavaScript, TypeScript, React, Node.js, Next.js (reading and reviewing code; building with AI tools)

Languages: English, Hindi, Marathi

EDUCATION

B.Tech, Computer Engineering · Pimpri Chinchwad College of Engineering (PCCOE), Pune — Sep 2025 – Jun 2029

HSC (Science) · Dahanukar Vidyalaya Science & Commerce Junior College — 2023 – 2025

SSC · Dahanukar English Medium School — 2023
